Amendments to the Claims

This listing of claims will replace all prior listings of claims in the application.

Listing of Claims

- 1. (Currently Amended) An electroless copper plating solution, containing a water-soluble nitrogen-containing polymer and glyoxylic acid and phosphinic acid as reducing agents in the electroless copper plating solution, wherein the concentration of the water-soluble nitrogen-containing polymer is 0.0001-5 g/L, the concentration of glyoxylic acid is 0.005-0.5 mol/L and the concentration of phosphinic acid is 0.001-0.5 mol/L.
- 2. (Original) An electroless copper plating solution according to Claim 1, wherein the water-soluble nitrogen-containing polymer is a polyacrylamide or a polyethyleneimine.
- 3. (Previously Presented) An electroless copper plating solution according to Claim 1, wherein a weight average molecular weight (Mw) of the water-soluble nitrogen-containing polymer is at least 100,000, and Mw/Mn (Mn is a number average molecular weight thereof) is 10.0 or less.

4. (Canceled)

- 5. (Previously Presented) In an electroless copper plating method for depositing a copper plating on a substrate, the improvement comprising performing the electroless copper plating with the electroless copper plating solution according to Claim 1.
- 6. (Previously Presented) An electroless copper plating solution, containing a polyacrylamide and glyoxylic

acid and phosphinic acid as reducing agents in the electroless copper plating solution.

- 7. (Previously Presented) An electroless copper plating solution, containing a polyethyleneimine and glyoxylic acid and phosphinic acid as reducing agents in the electroless copper plating solution.
- 8. (New) An electroless copper plating solution according to Claim 1, wherein copper sulfate is used as a copper source.
- 9. (New) An electroless copper plating solution according to Claim 8, additionally comprising ethylenediaminetetraacetate.
